

The Year in review 2024

January 2024: Enhancement of our ESG country ratings

ESG Ratings

The environmental risk assessment has been enhanced with the inclusion of new components: Biodiversity & Natural Endowments and Industrial Pollution.

The tool offers flexibility, enabling users to customize scores and adjust weightings for specific categories based on their objectives and priorities.

March 2024: 25th anniversary of ECB Survey of Professional Forecasters (SPF)

A presentation on our machine learning and AI applications in economics was delivered during an internal seminar at the European Central Bank.

Participation in a round-table discussion on current challenges in forecasting..

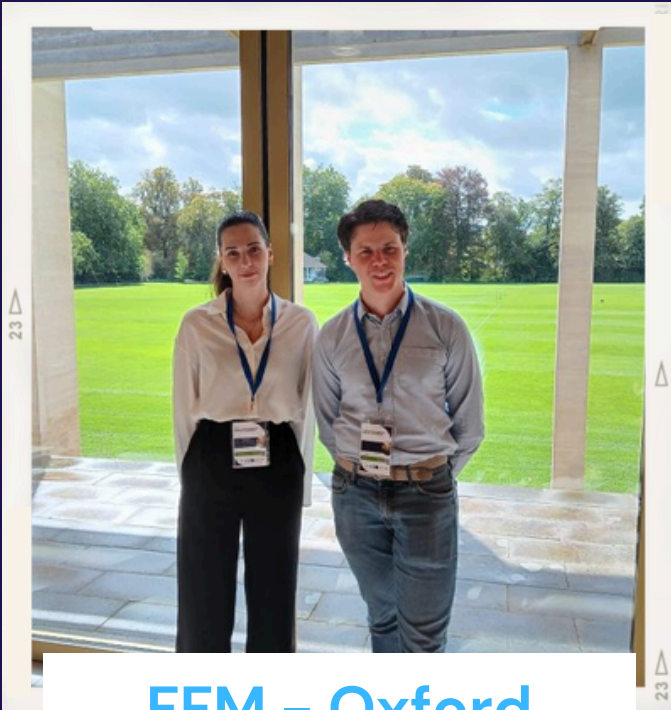

Two meetings with our customers and partners on topical issues of concern to decision-makers and investors:

June 2024: analysis of the french election results and economic and financial implications

November 2024: Trump's victory and its economic, financial and geopolitical consequences

September 2024 : Virginie Gautier and Didier Liron, at
Forecasting Financial Markets Conference

FFM – Oxford

Didier had the opportunity to co-present with Guillaume Beguec a joint project between Gwenlake and TAC ECONOMICS on Large Language Models and Advanced Agents for Economic Analysis.

Virginie presented the initial results of her work on identifying and quantifying exchange rate contagion mechanisms and their links with financial crises.

September 2024: launch of a geopolitical risk monitoring service

GeoPolitical Sensitivity Index (GPSI): Development of a tool to measure the degree of sensitivity of each country to current geopolitical changes

Alert on GeoPolitical Tensions (GPT-Alert): Real-time alert system for critical or weak signals indicating the approach or imminence of tensions and/or a crisis

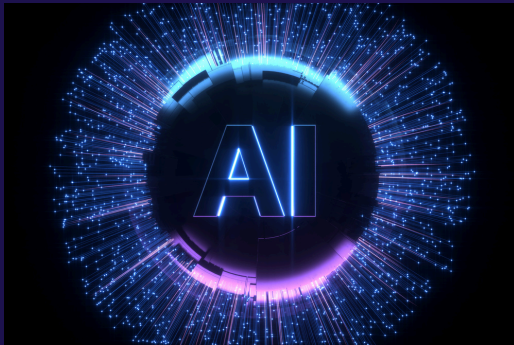

Results accessible on a web platform, customisable indicators, in-depth on-demand analyses
